

Synthesis Of Small Molecule Histone Deacetylase 6 Degraders, Compounds Formed Thereby, And Pharmaceutical Compositions Containing Them

[View U.S. Patent No. 11,045,458 in PDF format.](#)

WARF: P180321US03

Inventors: Weiping Tang, Ka Yang, Hao Wu

The Invention

Histone deacetylase ("HDAC")-selective inhibitors covalently bonded to a linker covalently bonded to an E3 ubiquitin ligase ligand, and salts thereof; pharmaceutical compositions containing them; methods of using the composition to inhibit neoplastic cell growth in mammals, including humans.
